# AAMVA FDR e-Learning LMS Delivery
Quick Start Guide
January 2016

1) System Requirements:

- Internet Explorer (version 6.0 or higher) or similar browser.
- Active X controls must be allowed
- Adobe Flash OR HTML5 player
- Adobe Reader

2) Downloaded File:

Opening the downloaded zip file reveals the parent directory. Extract the files to a location of your choice.

3) Open the Level 1 and Level 2 Folders to Access and Upload EACH Compressed SCORM Package to your LMS

4) Loading within LMS:

- Please follow your LMS application's instructions for creating the necessary directories and loading the appropriate files.
- When uploading to your LMS, **upload EACH module's zip file individually either as its own course, or as a lesson within a course**.
- Depending on your LMS requirements, loading the SCORM may be automatically performed by the LMS, requiring you to simply upload the zipped SCORM.
- Other LMS systems may require you to unzip the SCORM within the LMS and assign the executable object targets within each module's LMS package. Generally, the targets used are either the "imsmanifest.xml" file or "player.html". Both files are found within each SCORM's main folder (after decompression).
- The course was developed using Articulate '13 (Presenter, Engage, Quizmaker) using SCORM 1.2 compliance tools.

6) Indexed Job Aid:

Job aids for each individual module have been discontinued and are now combined into a single indexed, searchable, electronic document. The Indexed Job Aid is provided so that you may deploy it to student workstations or to your intranet, thus giving students an electronic, easily accessed job aid for use on the job. Alternatively, a new module (00 Download Job Aid) has been created, and intended to be the first module for students to access. Here they are instructed to download the Job Aid from within the module before beginning the formal course.

7) Doc Authenticity Contacts:

This spreadsheet contains jurisdictional contacts who are experts with their driver and/or vehicle documents. Should your jurisdiction encounter suspicious documents from another jurisdiction, these contacts have been designated as the parties to whom you can reach out. The worksheet IS NOT contained within the courseware but can be distributed (and accessed via Microsoft Excel) by training managers to staff as deemed appropriate, or can be used in its .csv format to import into your agency's global contact utility.

Note: These same contacts can be accessed from the members-only Online Community Directory on the AAMVA website. Simply select "Driver Document Authenticity Contact" or "Vehicle Document Authenticity Contact" from the "Program Area/Subject" dropdown menu.

Lastly, agencies that partner with AAMVA in the maintenance of FDR have graciously provided their local fraud contacts. These can be found in the tabs of the Excel workbook. New tabs are added as agencies provide their contact lists.

8) Knowledge Assessment and Tracking:

Each course concludes with a 10-question knowledge assessment. Pass/Fail criteria have been preset to AAMVA's standard of 80%. At the conclusion of the assessment, scores will be automatically loaded to the LMS, and students may select the "print results" option to enter their identifying information and create an html file that can be saved or printed for their own records.

Modules that do not contain assessments are tracked as pass/fail to your LMS based on viewing of all slides contained within the module.

Because this installation package is intended for use with multiple versions of LMS, there is no inherent utility to identify or track student activity. Administrators are instructed to rely upon their LMS tracking and scoring capabilities for these functionalities.
